Career Objective

Experienced Project Management consultant and trainer, providing course development, advisory and consultation services across project management qualifications, including leading internal curriculum and technology projects. Brings this to a broader delivery background across healthcare, biotechnology and fintech, leading cross-functional teams through full Agile delivery cycles and governing scope, schedule and quality to deliver measurable outcomes. Seeks to apply this combination of training, consultation and hands-on project delivery expertise to complex, multi-stakeholder programs requiring strong governance and stakeholder coordination.

Skills and Abilities

Expertise Areas: Project management consultation, Training delivery & facilitation, Curriculum & training design, Cross-functional team leadership & coaching, Requirement elicitation & business analysis, Technical & business communication, Product review and Improvement.

Project Management Skills: Product roadmapping, Agile frameworks (Scrum, Kanban, Disciplined Agile), Project planning and estimation, Risk management & Governance, Resource management, Testing and validation, Change Management.

Professional Experience

PROJECT MANAGEMENT CONSULTANT **Apr 2024 - Current**

NATIONAL INSTITUTE OF TECHNOLOGY - PERTH, AUSTRALIA

- Provide subject-matter consultation as course developer and advisor across business and project management qualifications, including the Diploma of Project Management, Advanced Diploma of Program Management, and Graduate Diploma of Management (Learning).
- Participate in the validation of new and existing courses across the qualification suite, reviewing course design and assessment instruments against training package and regulatory requirements.
- Consult on project management content within civil and construction, and Information Technology management courses, confirming technical accuracy, industry relevance and alignment with current practice.
- Led course establishment for the Advanced Diploma of Program Management (BSB60720) from inception: formulated the course structure, defined units of competency, and designed and developed unit content; managed resourcing and liaised with admin, student services and trainers to launch and successfully execute the program from 2025.
- Train and assess students across the full project and program management competency set — cost, scope and schedule management, stakeholder engagement, governance, risk and compliance, project integration, procurement and delivery — applying current ways of working including Agile practices and the PMBOK Guide.
- Design, maintain and deliver assessment using industry-standard project management software (MS Project, Jira, Miro, Trello), ensuring instruments remain compliant with training package, industry and regulatory requirements while giving students practical, tool-based experience.

ASSOCIATE PROJECT MANAGER -> PROJECT MANAGER **Jul 2020 - Jul 2023**

LEAPFROG TECHNOLOGY INC. – KATHMANDU, NEPAL / SEATTLE, WASHINGTON, USA (REMOTE)

- Led and managed medium-scale software delivery projects through the full development lifecycle — including risk management, backlog prioritisation, sprint planning and release management — using Agile practices (Scrum, Kanban and Scrum of Scrums).
- Facilitated and coached cross-functional teams of up to 50 members across concurrent projects in the biotechnology and healthcare sectors, embedding value-driven ways of working within schedule, scope and quality standards.

- Directed discovery and requirements-elicitation sessions with a US drug-discovery client (a co-development partner), translating specialised domain requirements into a scoped, deliverable project plan.
- Led a 3-week pre-sales and inception phase for a US healthcare firm with Business Development, Solution Architecture and Product Management stakeholders, scoping and planning the initial MVP engagement.
- Delivered the core MVP on schedule, comprising a project planning module, target management system and assay request module, directly supporting the client's go-to-market pitch to pharmaceutical partners.
- Oversaw production and review of project artefacts, including technical requirements, UX design, architecture, and test and implementation documentation.
- Managed staffing across projects, monitoring team performance and implementing improvement strategies to meet delivery KPIs.

BUSINESS ANALYST **Apr 2019 - Jul 2020**

ESEWA FONEPAY PVT. LTD.- KATHMANDU, NEPAL

- Delivered business analysis across 15–20 concurrent and sequential projects, predominantly integrating third-party merchant payment services into the eSewa digital wallet fintech product.
- Led requirements analysis for onboarding major, high-volume merchant partners onto the platform for utility bill payments, increasing transaction volume by 7% and improving customer access to essential services.
- Analysed and documented requirements to digitise event ticketing and banking services through the product, opening new digital transaction channels and in-app promotions, and achieving a 13% adoption rate post-launch in 2019.
- Performed feasibility analysis and managed end-to-end coordination of digital integration projects — from requirement specification and impact assessment through to development, testing and deployment — ensuring adherence to schedule, scope and quality standards.
- Facilitated as Scrum Master and Product Owner, coaching the team through Agile ceremonies and requirement-analysis sessions to meet project objectives within timeline and value-delivery targets, building a collaborative and innovative development culture.
- Led requirement-elicitation sessions covering business case development, solution assessment and validation, use cases, wireframing/mockups and integration testing.
